Mr. Wm Douglas Gurkin
Edgewater Energy Solutions
1805 Lakehurst Road
Spicewood, Texas 78669

Dear Doug:

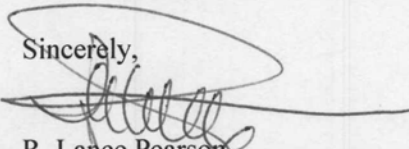

It is with great pleasure I take this opportunity to detail the help that Edgewater Energy Solutions has provided to Travis County Health and Human Services.

Receiving \$4,622,699.00 in ARRA WAP funds has been a challenge. Travis County Housing Services has operated a Department of Energy funded Weatherization program for the past 20 years. This year and 2011 will be our highest funded years in program history. The addition of the ARRA funding to our program required a drastic increase in annual production. It was decided early in the planning stages that Travis County would concentrate on Multifamily Housing for our ARRA Weatherization program.

Edgewater Energy Solutions brought us four income and structurally qualified multifamily properties totaling 566 units. Edgewater Energy Solutions orchestrated and supplied the manpower to interview, collect household data and complete applications for all 566 units. When additional information was required, Edgewater was proactive in assuring we had applications that were fully compliant. During audit testing and construction our team was in constant contact with Edgewater personnel. Edgewater assisted Travis County Housing Services from intake to final inspection making sure that all parties concerned were informed and ready to complete the project.

To date Travis County Housing Services is projected to spend all ARRA WAP funds at its disposal. The support of Edgewater Energy Solutions has greatly assisted our program in achieving this goal.

Sincerely,

R. Lance Pearson
Social Services Program Administrator
